

JÄRJESTÖTIETO- JÄRJESTELMÄ

WEB BASED SOLUTION FOR MANAGING
ASSOCIATION INFORMATION

Association information system that makes interactions between student unions and their associations easier and more efficient.

The system can be applied for

- applications for grants
- keeping contact information up-to-date

Technologies used

- Front-end: Svelte (SvelteKit, Skeleton UI Kit)
- Back-end: Node.js
- Database: PostgreSQL
- Version control: Gitlab
- Project management: Gitlab Kanban

System API:s

- keycloak to manage user access
- association information to be added to unions web page

Development team

Hannemari Kuusisto (PM)

Eveliina Mäkinen (PO)

Jaakko Hirvelä (senior developer)

Tino Kaartovuori (senior developer)

Paavo Jyrkiäinen (developer)

Tuukka Salonen (developer)

Teemu Salonen (developer)

COMP.SE.610 and 620, autumn 2023
